

*“A diet rich in phytochemicals from berries could help improve brain health in several ways, such as improving communication pathways and protecting against oxidative stress ”, say Miller and his researcher team in their review published in the Journal of Agricultural and Food Chemistry.*

On the other side : *“two glasses of cranberry juice a day may protect against the development of hardening of the arteries ”* according to another new study published in European Journal of Nutrition.

The power of polyphenols from berries, and also from others fruits and vegetables, in the human health is currently the hot topic for which many researchers are working. Every day, news positive effects are found and published in scientific reviews. But how really about polyphenols applications ?
