

We cordially invite you to participate in the **7th ISANH World Congress on Polyphenols Applications** to be held at the **University of Bonn, Germany,** on **June 6-7, 2013**.

This year's congress will focus on medicinal, nutritional, technological and analytical aspects of polyphenols and will thus address some of the most challenging topics in this field of research.

The 7th World Congress on Polyphenols Applications will bring together experts from academia and industry to discuss latest scientific developments in research on polyphenols. The conference will also provide a platform for young, emerging scientists to present their research results in oral or poster form. A prize will be awarded by the scientific committee for outstanding presentations and selected contributions will be invited for submission of an original paper or a review to a peer-reviewed journal such as Food Research International.

We look forward to meeting you in Bonn this June!

Prof. Dr. Andreas Schieber, Chairman of the Scientific Committee
